Tubes

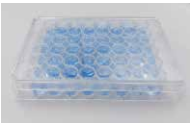

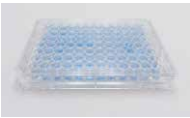

Item Code	Product
 PW-15-TC-CT	15mL TC tube, enzyme free, sterilized (maxrcf: 17500xg) 50pcs/bag, 10bags/box (total 500pcs.)
 PW-50-TC-CT	50mL TC tube, enzyme free, sterilized (maxrcf:17500xg) 25pcs/bag, 20bags/box (total 500pcs.)
 PW-50-TCSC-CT	50mL TC tube, self-Standing, enzyme free, sterilized (maxrcf: 17500xg) 25pcs/bag, 20bags/box (total 500pcs.)
 PW-1.5-MT-BG	1.5mL microtube, enzyme free, sterilized (maxrcf: 18000xg) (total 500pcs.)
 PW-2.0-MT-BG	2mL microtube, enzyme free, sterilized (maxrcf: 18000xg) (total 500pcs.)

Our centrifuge/culture tubes are made from high-transparency polypropylene with leak proof lid, it is strong and have a high centrifugal force (rcf) resistance. It can withstand -80°C to 121°C . They are sterile, non-cytotoxic, pyrogen-free, endotoxin-free, DNA-free and DNase and RNase free.

Item Code	Product
 PW-8-PCR-CT	0.2mL, transparent, 8-strip PCR tubes with flat caps (total 125pcs.)
 PW-02-PCR-CT	0.2mL, transparent, Flat top PCR tubes with flat caps (total 1000pcs.)

Our PCR tube are flat Lid, Enzyme-free made from high-transparency polypropylene, the thin but strong tube wall provide a highly uniform temperature control for the sample. Suitable for qPCR and compatible with most PCR instruments. They are sterile, non-cytotoxic, pyrogen-free, endotoxin-free, DNA-free and DNase and RNase free.

Culture Plates, Culture Flask, Culture Dish, and Petri Dish

	Item Code	Product
	PW-6-WP-CT	6 well plate with cover, sterilized, flat bottom, TC treated, individual packed (diameter 33.6mm) (total 50pcs.)
	PW-12-WP-CT	12 well plate with cover, sterilized, flat bottom, TC treated, individual packed (total 50pcs.)
	PW-24-WP-CT	24 well plate with cover, sterilized, flat bottom, TC treated, individual packed (total 50pcs.)
	PW-48-WP-CT	48 well plate with cover, sterilized, flat bottom, TC treated, individual packed (total 50pcs.)
	PW-96-WP-CT	96 well plate with cover, sterilized, flat bottom, TC treated, individual packed (total 100pcs.)
	PW-25-CFV-CT	25cm ² T25 cell culture flask, vented cap with filter, sterilized, TC treated 10pcs/bag, 20bags/box (total 200pcs.)
	PW-75-CFV-CT	75cm ² T25 cell culture flask, vented cap with filter, sterilized, TC treated 5pcs/bag, 20bags/box (total 100pcs.)
	PW-175-CFV-CT	175cm ² T25 cell culture flask, vented cap with filter, sterilized, TC treated 5pcs/bag, 6bags/box (total 30pcs.)
	PW-35-CD-CT	35mm cell culture dish, flat bottom, sterilized, TC treated, 20pcs/bag, 50bags/box (total 1000pcs.)
	PW-60-CD-CT	60mm cell culture dish, flat bottom, sterilized, TC treated, 20pcs/bag, 25bags/box (total 500pcs.)
	PW-100-CD-CT	100mm cell culture dish, flat bottom, sterilized, TC treated, 20pcs/bag, 25bags/box (total 500pcs.)

Culture Plates, Culture Flask, Culture Dish, and Petri Dish

	Item Code	Product
	PW-150-CD-CT	150mm cell culture dish, flat bottom, sterilized, TC treated, 5pcs/bag, 12bags/box (total 60pcs.)
	PW-60-PDTV-CT	90mm petri dish, triple vent, sterilized, material: PS, flat bottom, transparent 20pcs/bag, 25bags/box (total 500pcs.)
	PW-90-PDTV-CT	90mm petri dish, triple vent, sterilized, material:PS, flat bottom, transparent 20pcs/bag, 25bags/box (total 500pcs.)

All our culture plates, dishes, and flasks are made from high clarity polystyrene and each wells and surfaces are highly flat—ideal for sample imaging purpose.

The Culture Plates TC-treated and individually sealed to guarantee sterility. Condensation rings on the lids reduce evaporation while allowing gas exchange. Precision-flat wells and plate bottoms support high-resolution imaging and adherent cell growth.

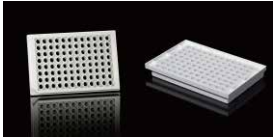

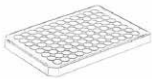

The Culture Dishes Uniform-thickness walls and an easy-grip ring for safer handling. Flat bottoms and a reinforced skirt ensure secure, space-saving stacking. Perfect for adherent and semi-adherent cell culture, inoculation, streaking, and bacterial isolation.

The Culture Flasks Flat-bottom Erlenmeyer design for uniform cell growth and mixing; curved mouth for easy pipetting, frosted neck for labeling, volume graduations, stackable shoulders, and a 0.2 μm breathable membrane cap for gas exchange.

All formats are made according to the ANSI/SLAS (SBS) standard and it can be used in equipment required this format. Non-cytotoxic, pyrogen-free, endotoxin-free, DNA-free and DNase and RNase free.

Our Sterile Petri dish are made from highly transparent polystyrene with uniform thickness wall and light in weight. Its triple vent lid design to reduce lid condensation, the bottom skirt design for a firm stacking and convenient storage. Perfect for inoculation, streaking, and bacterial isolation.

Assay Plates

	Item Code	Product
	PW-96-BCP	96 well 350μL, black, non-sterile, clear polystyrene bottom, pack of 100
	PW-96-WCP	96 well 350μL, white, non-sterile, clear polystyrene bottom, pack of 100
	PW-96-BSP	96 well 350μL, black, solid bottom, non-sterile, untreated, pack of 100
	PW-96-WSP	96 well 350μL, white, solid bottom, non-sterile, untreated, pack of 100
	PW-96-WPL	96 well lid with condensation rings, pack of 100
	PW-U-WPL	Universal lid – clear with corner notch, pack of 100

Our assay plates are meticulously crafted using premium virgin polystyrene (PS) and expertly polished tools to ensure exceptional quality. We prioritize delivering the best results to our customers by minimizing flow lines, artifacts, and scratches.

Our 96 round well plates are available in three options: black, white, and clear. Additionally, we offer a variety of bottoms, including solid bottom and clear bottom designs.

Solid Bottom: Our solid bottom assay plates are ideal for a wide range of applications, striking a perfect balance between affordability and top-notch quality. Designed to optimize results for instruments that read from the top of the plate, these plates consistently deliver excellent performance.

Clear Bottom: The clear-bottomed plates undergo a meticulous ultrasonic welding process conducted by our skilled technical engineers. This technique guarantees a flawless seal every time, eliminating the inconsistencies often associated with other welding methods. With flat, optically clear bases for each well and zero leakage, these plates provide exceptional accuracy and reproducibility for readings. The bottom thickness measures at 0.75mm, allowing for easy viewing of cells grown on the surface using an inverse microscope. Additionally, light-emitting assays can be measured effectively from the bottom.

Reservoir

	Item Code	Product
	PW-12CR-HS	12 channel pp reservoir - 22mL (V bottom); sterile (L127.8 x W85.5 x H44.5mm), pack of 50
	PW-1R-LS	Single well, flat bottom pp reservoir - 190mL; sterile (L127.8 x W85.5 x H31.4mm), pack of 50
	PW-25R	25mL, reservoir (white PS), individually packed - sterile, pack of 100
	PW-50R	50mL, reservoir (white PS), individually packed - sterile, pack of 100

Our Polypropylene Reagent Reservoirs, the perfect solution for your laboratory needs. Crafted from high-quality virgin Polypropylene, these reservoirs ensure superior performance and durability.

They are available in various formats to suit your specific requirements. Whether you need a reservoir for a single liquid or a partitioned design with 12 rows with high profile and larger capacity for handling multiple liquids, we have you covered. These versatile reservoirs provide convenience and efficiency in your laboratory workflows.

Our disposable reagent reservoirs, specifically designed to cater to all multichannel pipette. With their four corners and sharp V-bottom shape, these reservoirs guarantee optimal sample retrieval. Each reservoir is meticulously crafted from high-quality polystyrene, ensuring reliable performance. They are conveniently packed individually and undergo sterilization to maintain aseptic conditions.

Serological Pipette

	Item Code	Product
	PW-1-SPF-CT	1mL serological pipette, polystyrene, sterilized, non-pyrogenic, DNase/RNase free, with filter, 50pcs/bag (total 1000pcs.)
	PW-2-SPF-CT	2mL serological pipette, polystyrene, sterilized, non-pyrogenic, DNase/RNase free, with filter, 50pcs/bag (total 1000pcs.)
	PW-5-SPF-CT	5mL serological pipette, polystyrene, sterilized, non-pyrogenic, DNase/RNase free, with filter, 50pcs/bag (total 200pcs.)
	PW-10-SPF-CT	10mL serological pipette, polystyrene, sterilized, non-pyrogenic, DNase/RNase free, with filter, 50pcs/bag (total 200pcs.)
	PW-25-SPF-CT	25mL serological pipette, polystyrene, sterilized, non-pyrogenic, DNase/RNase free, with filter, 25pcs/bag (total 200pcs.)
	PW-50-SPF-CT	50mL serological pipette, polystyrene, sterilized, non-pyrogenic, DNase/RNase free, with filter, 25pcs/bag (total 100pcs.)

Our disposable serological pipettes are made from polystyrene, with filter to avoid contamination. Accurate $\pm 3\%$ at full volume, reverse graduations with negative graduations for extra capacity. Pipettes and packaging are color-coded for identifying volume conveniently. Individually packed pipettes in either for high sterility assurance. They are all sterile, non-cytotoxic, DNase and RNase free.

Pipette Tips

	Item Code	Product
	TP-10-B	10µL pipette tips, universal, bulk, 1000pcs/bag, 10bags/box (total 10000pcs.)
	TP-10L-B	10µL pipette tips, extended length, universal, bulk, 1000pcs/bag, 10bags/box (total 10000pcs.)
	TP-200-B	200µL pipette tips, universal, bulk, 1000pcs/bag, 20bags/box (total 20000pcs.)
	TP-1000-B	1000µL pipette tips, universal, bulk, 500pcs/bag, 10bags/box (total 5000pcs.)
	TP-1000L-B	1000µL pipette tips, extended length, universal, bulk, 500pcs/bag, 10bags/box (total 5000pcs.)
	TP-5000T-B	5mL pipette tips, Thermo Fnpipette compatible, bulk, 100pcs/bag, 20bags/box (total 2000pcs.)
	TP-5000E-B	5mL pipette tips, Eppendorf & D-Lab compatible, bulk, 100pcs/bag, 20bags/box (total 2000pcs.)
	TP-10000E-B	10mL pipette tips, Eppendorf & D-Lab compatible, bulk, 100pcs/bag, 10 bags/box (total 1000pcs.)
	TP-10-R-S	10µL pipette tips, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TP-10L-R-S	10µL pipette tips, extended length, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TP-200-R-S	200µL pipette tips, universal, racked, sterile, 96pcs/rack, 100 racks/box (total 9600pcs.)

Pipette Tips

Item Code	Product
	TP-200L-R-S 200µL pipette tips, extended length, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TP-1000-R-S 1000µL pipette tips, universal, racked, sterile, 96pcs/rack, 50racks/box (total 4800pcs.)
	TP-1000L-R-S 1000µL pipette tips, extended length, universal, racked, sterile, 96pcs/rack, 50racks/box (total 4800pcs.)
	TP-5000T-R-S 5mL pipette tips, Thermo Finpipette compatible, racked, sterile, 28pcs/rack, 50racks/box (total 1400pcs.)
	TP-5000E-R-S 5mL pipette tips, Eppendorf & D-Lab compatible, racked, sterile, 28pcs/rack, 50racks/box (total 1400pcs.)
	TP-10000E-R-S 10mL pipette tips, Eppendorf & D-Lab compatible, racked, sterile, 24pcs/rack, 50racks/box (total 1200pcs.)
	TPF-10-B 10µL pipette tips, filtered, universal, bulk, 1000pcs/bag, 10bags/box (total 10000pcs.)
	TPF-10L-B 10µL pipette tips, extended length, filtered, universal, bulk, 1000pcs/bag, 10bags/box (total 10000pcs.)
	TPF-20-B 20µL pipette tips, filtered, universal, bulk, 1000pcs/bag, 20bags/box (total 20000pcs.)
	TPF-100-B 100µL pipette tips, filtered, universal, bulk, 1000pcs/bag, 20bags/box (total 20000pcs.)
	TPF-200-B 200µL pipette tips, filtered, universal, bulk, 1000pcs/bag, 20bags/box (total 20000pcs.)

Pipette Tips

	Item Code	Product
	TPF-1000-B	1000µL pipette tips, filtered, universal, bulk, 500pcs/bag, 10bags/box (total 5000pcs.)
	TPF-5000T-B	5mL pipette tips, Thermo Finpipette compatible, filtered, bulk, 100pcs/bag, 20bags/box (total 2000pcs.)
	TPF-5000E-B	5mL pipette tips, Eppendorf & D-Lab compatible, filtered, bulk, 100pcs/bag, 20bags/box (total 2000pcs.)
	TPF-10-R-S	10µL pipette tips, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-10L-R-S	10µL pipette tips, extended length, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-20-R-S	20µL pipette tips, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-100-R-S	100µL pipette tips, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-200-R-S	200µL pipette tips, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-200L-R-S	200µL pipette tips, extended length, filtered, universal, racked, sterile, 96pcs/rack, 50racks/box (total 4800pcs.)
	TPF-1000-R-S	1000µL pipette tips, filtered, universal, racked, sterile, 96pcs/rack, 50racks/box (total 4800pcs.)
	TPF-1000L-R-S	1000µL pipette tips, extended length, filtered, universal, racked, sterile, 96pcs/rack, 50racks/box (total 4800pcs.)

Pipette Tips

Item Code	Product
	TPF-5000T-R-S 5mL pipette tips, Thermo Finpipette compatible, filtered, racked, sterile, 28pcs/rack, 50racks/box (total 1400pcs.)
	TPF-5000E-R-S 5mL pipette tips, Eppendorf & D-Lab compatible, filtered, racked, sterile, 28pcs/rack, 50racks/box (total 1400pcs.)
	TPF-10000E-R-S 10mL pipette tips, Eppendorf & D-Lab compatible, filtered, racked, sterile, 24pcs/rack, 50racks/box (total 1200pcs.)
	TPF-10L-LR-R-S 10µL pipette tips, extended length, low retention, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-20-LR-R-S 20µL pipette tips, low retention, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-100-LR-R-S 100µL pipette tips, low retention, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-200-LR-R-S 200µL pipette tips, low retention, filtered, universal, racked, sterile, 96pcs/rack, 100racks/box (total 9600pcs.)
	TPF-1000L-LR-R-S 1000µL pipette tips, extended length, low retention, filtered, universal, racked, sterile, 96pcs/rack, 50racks/box (total 4800pcs.)

Our pipette tips are made from highly clear polypropylene with precision moulding to ensure accurate delivery of every microliter. Supplied in both bulk packs and sterile, ready-to-use racks, they span volumes from 10 µL to 10 mL. The 10 µL to 1000 µL tips feature a universal fit for leading pipette brands—Eppendorf, Thermo, Brand, Gilson, Rainin, D-Lab and more—while the 5 mL and 10 mL tips offer two neck styles: T-type for Thermo Finpipettes and E-type for Eppendorf and D-Lab models.

For added protection, our polyethylene (PE) filter tips incorporate a hydrophobic barrier that prevents aerosol and liquid carryover, safeguarding sample integrity, maintaining pipetting precision, and extending the life of your pipette.

For applications requiring minimal sample loss, our upgraded tips are treated with low retention treatment to eliminate liquid cling on both inner and outer surfaces. This reduces sample residue, enhances transfer accuracy, and conserves precious reagents—especially vital in protein and nucleic acid research.
